What is Marlowe

Intuitive, efficient, and secure smart contracts

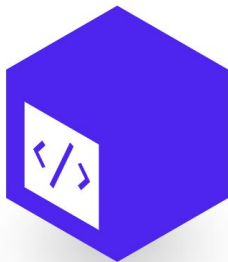

What is Marlowe?

Marlowe is an ecosystem of open source tools and language to enable development of financial and transactional smart contracts.

- **Programming Language**
- **Scanner**
- **Playground**
- **Runner**
- **Tools for DApp developers:** Runtime, Typescript SDK, CLI, Starter Kit, etc.

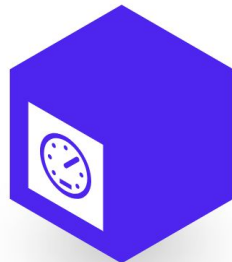

Why should I care?: Overview

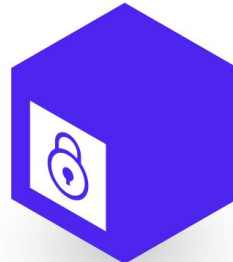

Simple

It lowers the entry bar to easily design, validate, and deploy smart contracts.

Efficient

Batteries includes: It offers all the tools needed to create and deploy smart contracts so you can focus on business logic.

Secure

Marlowe language is formally proven and fully audited at enterprise-grade level.
